Souber Tools®

Burrs

After more than 2 years in development, we are pleased to launch a complete range of Locksmiths Burrs for their own dedicated work.

These have all been designed from scratch and will enable the locksmith to do all sorts of "on-site" jobs and work on the bench.

The most exciting of these products is the new **Magi-Burr®** for Euro Profile Lock Opening. To help with this, we have made a beginners guide video to opening locks in a step by step process.

Magi Burr®

- Great for cylinder opening
- Anti-Snatch and Anti-Snag features.
- Specifically designed to easily open Euro-Profile cylinders including 3 Star versions and armoured TS007 hardware.

Plain Burr

- For Steel, Brass and Aluminium
- High Grade Carbide
- 27mm length of cutting teeth
- Perfect for quick and easy modifying jobs
- Fast material removal

Safe-End Burr

- Great for Lever Lock work
- Safe end prevents lever damage
- Anti-clog
- Flat bottomed

All of our Burrs work very well for those who use cordless Dremel® or Milwaukee® rotary tools.

Locksmiths views on the Magi Burr

Once I picked up the Magi Burr and put it into the high security cylinder protector, I knew I was on a winner for defeating not only jammed or failed cylinders, but any cylinder if I wanted a destructive entry very quickly, regardless of protection in place". Terry Watts,FMLA, London

"Impressive and does what it says. Successful on most makes of cylinder. Some openings in under 60 seconds. The product was field tested with impressive results".

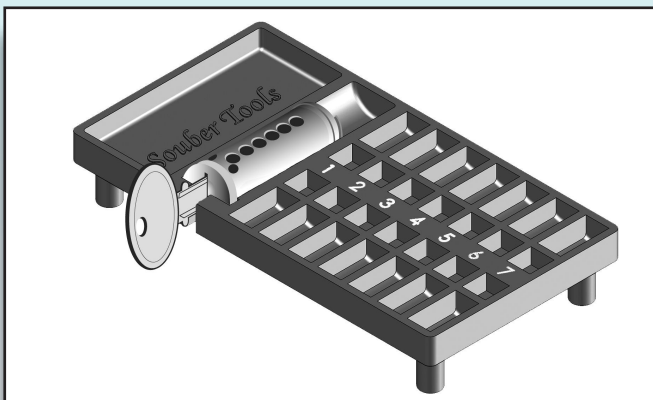

Mark Robinson, locksmith, Wirral

Lock Assembly Tray

This little tray is a great handy helper when pinning-up cylinders in the van or in the workshop. It holds the plug and key while you drop the pins into place. Robust and simple is all we can say.

Straight Pointed Tweezers

These long pointed Tweezers complement the new Lock Assembly Tray to simplify dropping the pins securely into place.

Locksmiths Wire Set

A set of 16 different wires in flat and round shapes to help with the jobs you may have to solve.

Repair Push Plates

For those Jobs where you need to cover all sorts of holes and damage on doors and Frames, these plates easily "double-up" as push plates and for repair work.

The 3 finishes are Gloss White, Silver Anodised Aluminium and Brushed Stainless Steel.

They are self adhesive as well, so they save time in fitting.

Burr Aid Kit

An ideal tool for the picking Locksmith. Comes with a protective clear plastic tube with self locking sides.

The picks help remove debris from keyway whilst the stainless steel wire brush cleans off deposits from burrs.

Wire Brush Only

Our new Wire Brush is great for cleaning the deposits the Burrs, but because the bristles are stainless they are good for other little jobs too.
